Art Unit: 1652

Applicant's response to restriction requirement filed 5/27/2003 (Paper # 24) is acknowledged.

Applicant elected Group II invention directed to claims 8-11, 14-24, 27-31 and 33 without traverse.

Upon further review of the previous office action further restriction of the elected invention is deemed necessary as explained below:

Group IIa: claims 8-11, 14-24, 28-31 and 33, directed to methods of assaying β -glucosidase, classified in class 435, subclass 105.

Group IIb: claim 27, drawn to methods of solubilizing said enzyme, classified in class 435, subclass 105.

The inventions of Groups II a-IIb are patentably distinct because each method has different steps and different end-points.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. G. P. Einhorn on 9/11/2003 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1652

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
